Conservation Agriculture is a farming system that promotes minimum soil disturbance (i.e. no tillage), maintenance of a permanent soil cover, and diversification of plant species. It enhances biodiversity and natural biological processes above and below the ground surface, which contribute to increased water and nutrient use efficiency and to
improved and sustained crop production. (i.e. no tillage) through direct seed and/or fertilizer placement. (at least 30 percent) with crop sequences and associations involving at least three different crops. knox county forms 18/8/2015. Addeddate 2015-08-18 13:36:27 Identifier
